

# School Outreach Programmes

Green Footprint aims at honing overall skills and interpersonal growth of children through outdoor based activities based on varying subjects encompassing our environment.

## Aims & Objectives

- Give impetus to academic outdoor activities.
- Creating skill-based employment.
- Honing skills & overall development i.e physical as well as mental.
- Baton of change in the interest of environment.
- Widening exposure over practical knowledge.

## Skill-Based Activities

### ✦ Adventure Activities

We have had a set of adventure activities set up amidst the forest, in the backdrop of the Himalayas. Activities like Zip lining, Burma bridge, Ladder climbing, Rappelling, Jumaring are to name a few.

### ✦ Birding & Butterflying

Uttarakhand is home to approximately 50% of birds and butterflies found in India, including some rare and endangered species. More than 740 species of birds and over 500 butterfly species are found here.

### ✦ Survival Skills

Shelter, water and foods are some of essentials needed for one's survival. Let us learn whats and hows of jungle with a team of experts.

### ✦ Wildlife & its Habitat

It has always been a fascinating experience to witness wildlife in its natural habitat. Observing its behaviour & routines help us understand how sensitive and important they are to the nature.

# Himalayan Shepherd by Souldrifts

Himalayan Shepherd aims at striving for sustainable tourism duly aided by the locals, encompassing every section of society. Uplifting rural tourism, Youth training programmes & Experiential child learning are key highlights we are dedicatex towards.

## Eco Park, Munsyari

Sprawling over in hectares and overlooking the Mt. Panchachuli and Mt. Rajrambha, Eco Park is an amalgamation of cosy stay and copious nature, not to mention the abundance of flora and fauna the place inhabits. Kudos to the sweating effort put in by Mr. Brijesh Dharmshaktu and team, the place is home to some of rarest species of birds and wildlife found in the kumaon Himalayas. Talking of aromatic medicinal plants, there are many, which when studied and observed, would leave you obliged towards nature.
